

Evaluating the impact of healthcare information Planning DoView®

V1-2 2016-03-17

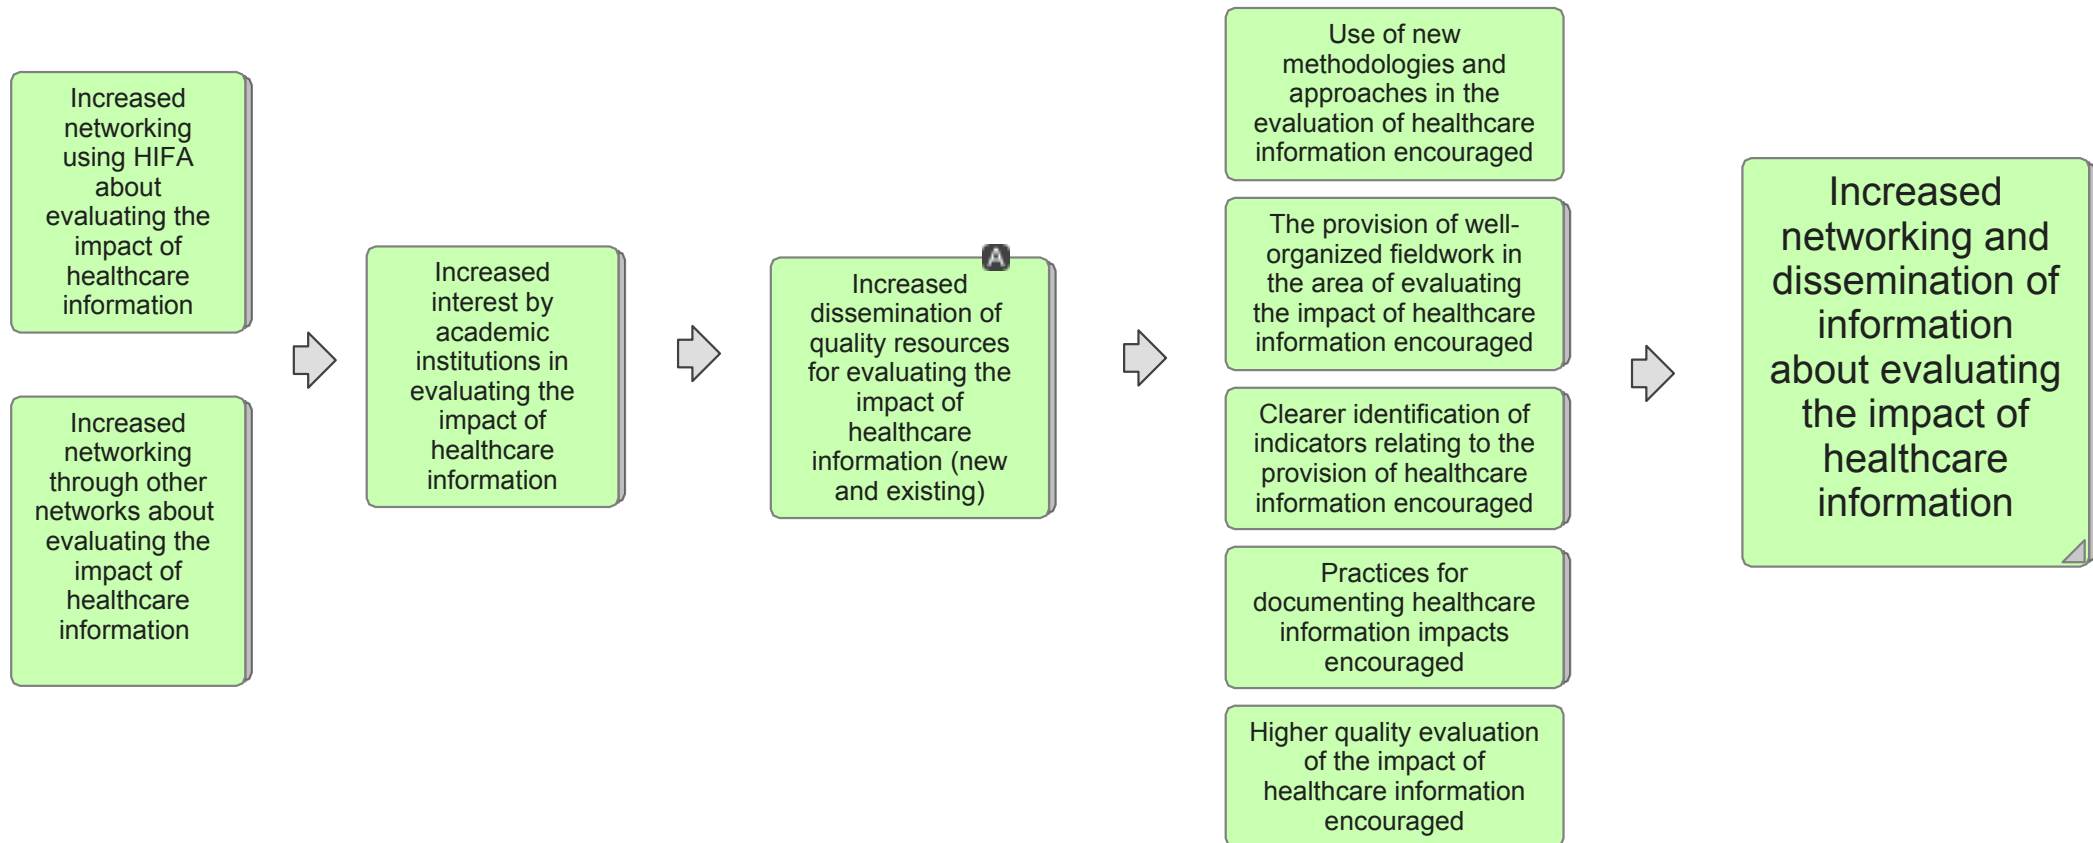

Not all feedback loops are shown.

Developed 11 Feb and 17 Mar 2016 by Paul Duignan and members of HIFA Working Group on Evaluating the Impact of Healthcare Information. Drawn according to the DoView Outcomes Model rules - DoView.com/plan/draw.html. paul@parkerduignan.com.

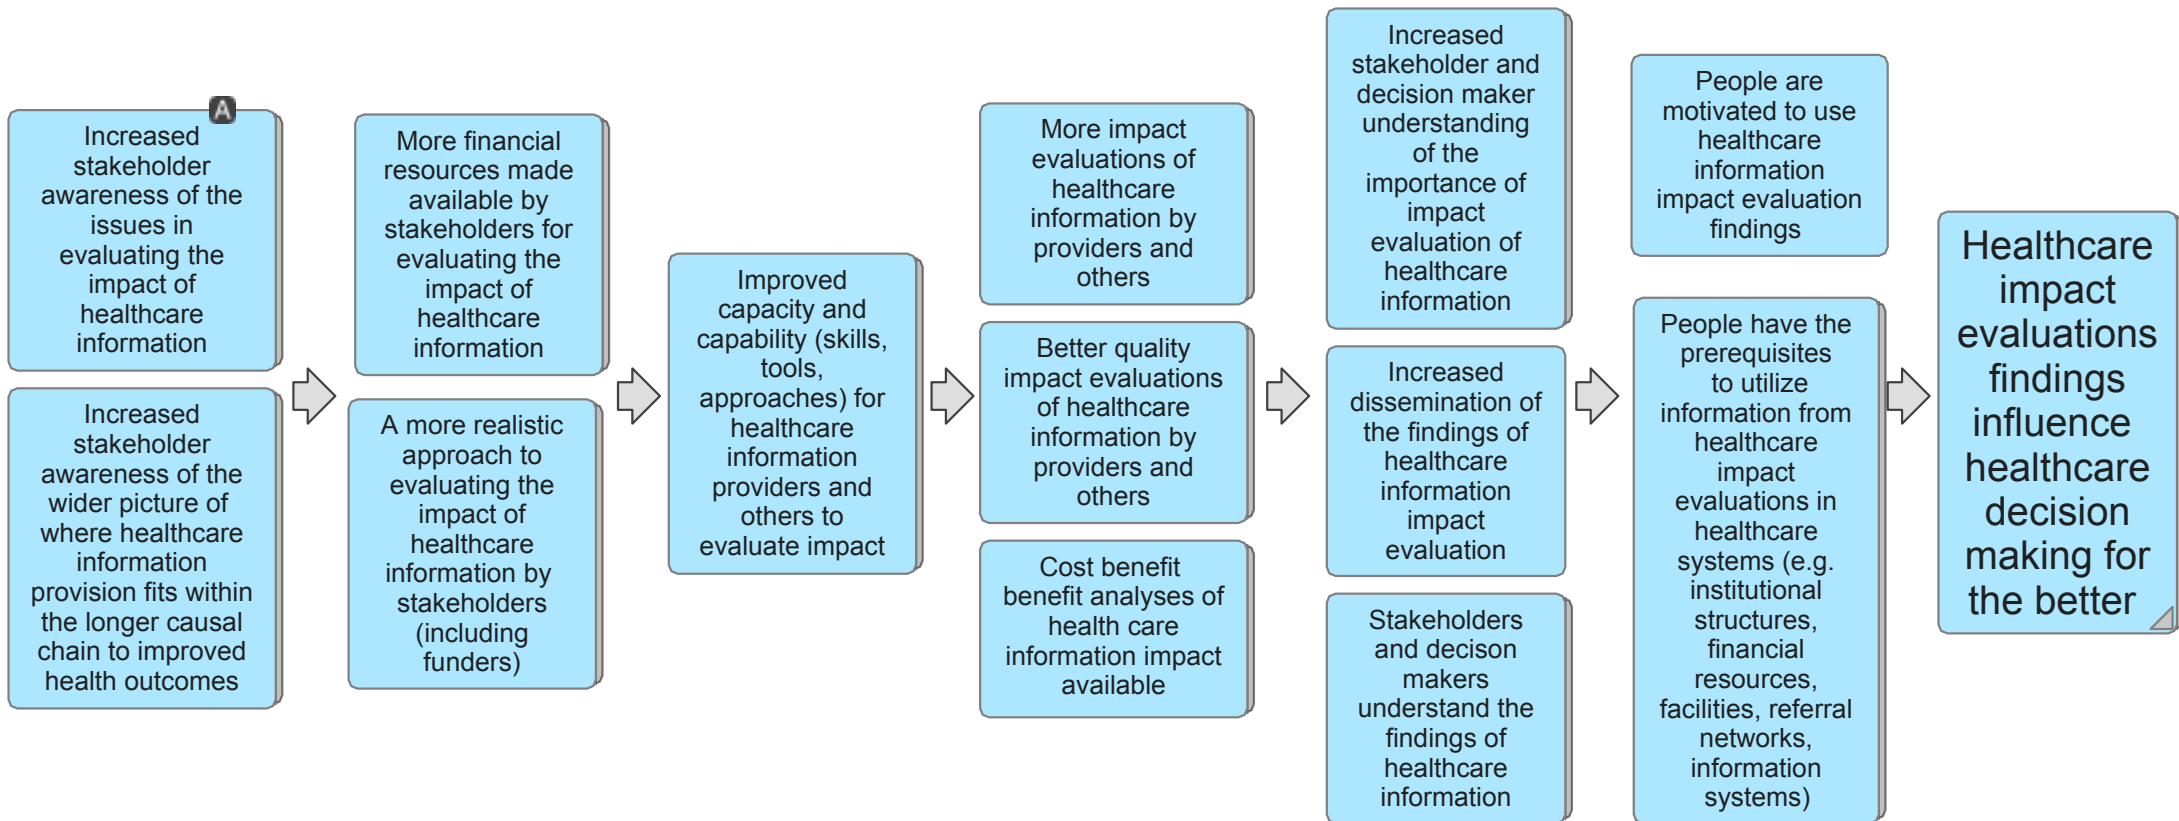

Not all feedback loops are shown.

Projects

Numbers show how many top-level boxes these projects focus on.

Steps and outcomes each project focused on

[P01] Geof Royston paper on evaluating health information 22

This makes happen:

- » Increased dissemination of quality resources for evaluating the impact of healthcare information (new and existing) 116
- » New resources for evaluating the impact of healthcare information created by this project 94
- » Specific methodologies for evaluating the impact of healthcare information 133
- » A more realistic approach to evaluating the impact of healthcare information by stakeholders (including funders) 123
- » Increased stakeholder awareness of the issues in evaluating the impact of healthcare information 117
- » Improved capacity and capability (skills, tools, approaches) for healthcare information providers and others to evaluate impact 119
- » Examining principles underlying impact evaluation of healthcare information 131

[P02] Contacting academic centers to spark interest in the area 23

This makes happen:

- » Others encouraged to build new resources for evaluating the impact of healthcare information 93
- » More impact evaluations of healthcare information by providers and others 134
- » Templates for use in evaluating the impact of healthcare information 137
- » Improved capacity and capability (skills, tools, approaches) for healthcare information providers and others to evaluate impact 119
- » Examining principles underlying impact evaluation of healthcare information 131
- » Increased interest by academic institutions in evaluating the impact of healthcare information 112
- » Identifying key people/institutions involved in evaluating the impact of healthcare information 92
- » Better quality impact evaluations of healthcare information by providers and others 125
- » Outcomes models, intervention logics and theories of change for evaluating the impact of healthcare information 135
- » Lists of indicators for evaluating the impact of healthcare information 128
- » Specific methodologies for evaluating the impact of healthcare information 133

[P03] Chris Zielinski's dissertation on indicators 27

This makes happen:

- » Clearer identification of indicators relating to the provision of healthcare information encouraged 113
- » Templates for use in evaluating the impact of healthcare information 137
- » Lists of indicators for evaluating the impact of healthcare information 128

[P04] Paul Duignan DoView Template on health information products 26

This makes happen:

- » Templates for use in evaluating the impact of healthcare information 137
- » Outcomes models, intervention logics and theories of change for evaluating the impact of healthcare information 135

[P05] Outreach to the wider HIFA community 50

This makes happen:

- » Increased networking using HIFA about evaluating the impact of healthcare information 110

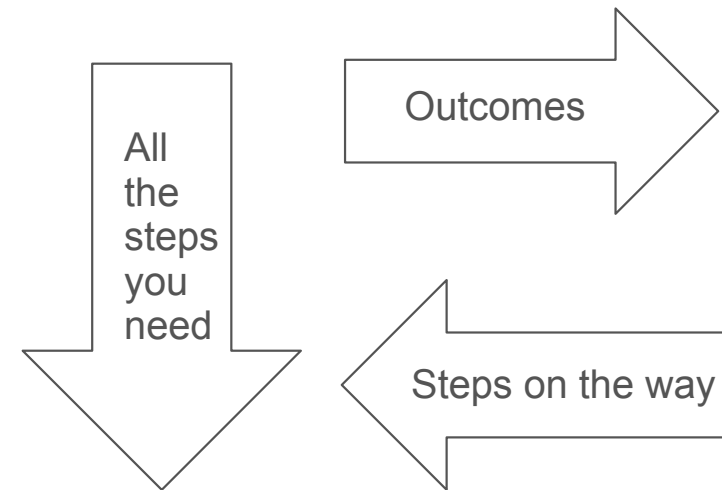

What's a DoView[®]?

A faster way to specify outcomes and the steps that lead to them.

For: strategic planning, monitoring, evaluating impact, performance improvement, tendering, contracting +.

Information on drawing and using DoViews and a free trial at DoView.com/plan/draw.html.
