## Q4 How interested are you in learning about...(Please rate your response.)

Answered: 82 Skipped: 11

	NOT INTERESTED	SOMEWHAT INTERESTED	VERY INTERESTED	TOTAL	WEIGHTED AVERAGE
Key tools and resources on FP/C (family planning and contraception)	8.54% 7	24.39% 20	67.07% 55	82	2.59
How to improve the use of evidence-based FP/C information among health workers	4.88% 4	20.73% 17	74.39% 61	82	2.70
How to improve the use of evidence-based FP/C information among citizens	7.32% 6	29.27% 24	63.41% 52	82	2.56
How to improve the use of evidence-based FP/C information among policymakers	4.88% 4	28.05% 23	67.07% 55	82	2.62
Promising practices and challenges in supporting FP/C service delivery and support	2.44% 2	23.17% 19	74.39% 61	82	2.72

## Q5 What challenges, if any, do you face in accessing accurate FP/C information? (You may choose more than one response.)

Answered: 82 Skipped: 11

ANSWER CHOICES	RESPONSES
Poor access to library / internet	31.71% 26
Information is not freely available (restricted access)	30.49% 25
Information is hard to find	26.83% 22
Information is not up to date	32.93% 27
Information is not relevant to my setting	19.51% 16
Information is not in the right language	19.51% 16
Other (please specify)	24.39% 20
Total Respondents: 82	

#	OTHER (PLEASE SPECIFY)	DATE
1	None	8/24/2017 11:03 AM
2	My challenge is getting the information out to those who can use it.	8/24/2017 9:06 AM
3	none	8/23/2017 6:07 PM
4	None, I have access to all information I need but it is not organized/synthesised in a way that I do not have to search and read several documents	8/23/2017 4:29 PM
5	Accuracy is not the issue. Typically, it's relevancy. More and more decisionmakers want data that is context-specific to their subnational area. It is difficult to find good subnational data sources.	8/23/2017 4:28 PM
6	Information is not accessible to diverse populations (i.e. in multiple languages, geared to newcomers and refugees)	8/22/2017 4:21 PM
7	MORE ACCESS TO INFORMATION AND SUPORT	8/21/2017 12:03 PM
8	Although in Honduras we have HINARI, the free access to some resources is not always available	8/21/2017 8:23 AM
9	Staff are not motivated to find it using our resources, but resort to Google instead	8/21/2017 5:12 AM
10	I want to be timely informed about innovations	8/17/2017 9:08 PM

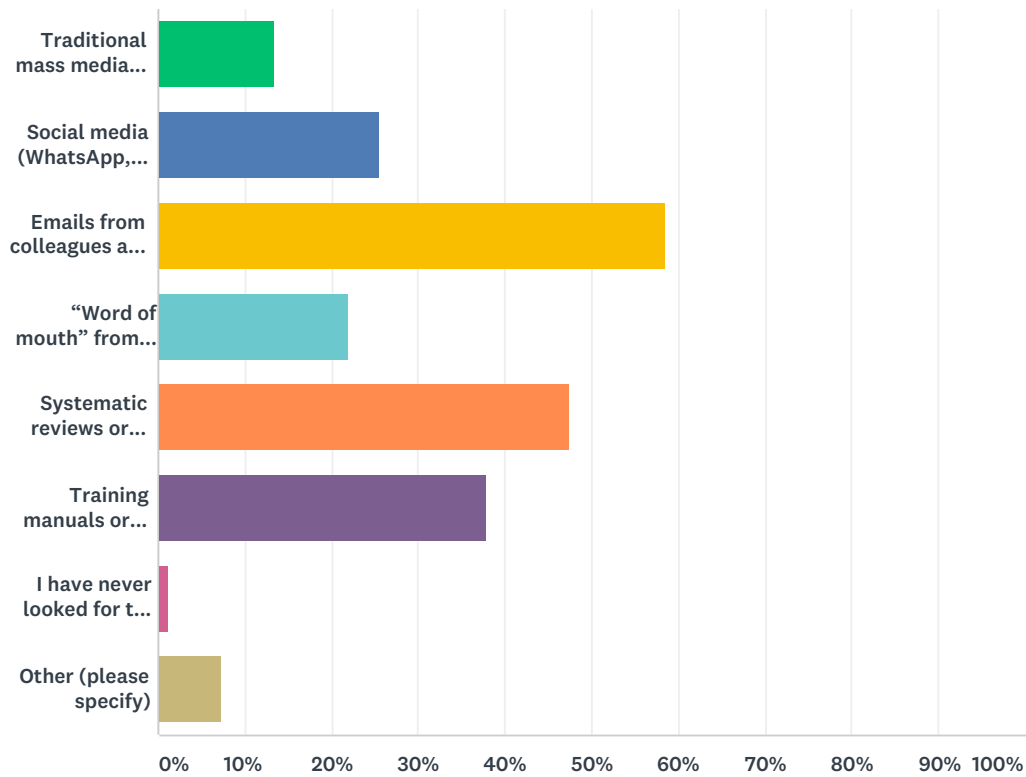

## HIFA Family Planning Project Survey

11	nil	8/17/2017 2:34 AM
12	So much information, need a portal to access information from several sources.	8/16/2017 9:35 PM
13	Policies are not up to date	8/16/2017 4:34 PM
14	I personally don't have issues accessing information. But I do think issues around information literacy and being able to evaluate and question information and sources are important in our field.	8/16/2017 3:04 PM
15	the advantage of hifa is access to real life experience with emerging or evidence based practices	8/16/2017 12:39 PM
16	None	8/16/2017 6:49 AM
17	No real challenges in UK.	8/16/2017 12:01 AM
18	Not really any problems in my part of the USA about this	8/15/2017 6:52 PM
19	Not enough time to sift through all the information for best and most relevant resources	8/15/2017 9:30 AM
20	Too much information; hard to determine what is the best source	8/14/2017 4:30 PM

## Q6 How are you most likely to learn about new developments in the field of FP/C? (Please choose up to 2 responses.)

Answered: 82 Skipped: 11

ANSWER CHOICES	RESPONSES
Traditional mass media (newspapers, radio, TV)	13.41% 11
Social media (WhatsApp, Facebook, Twitter, blogs, other)	25.61% 21
Emails from colleagues and organizations	58.54% 48
“Word of mouth” from colleagues or friends	21.95% 18
Systematic reviews or peer-reviewed literature	47.56% 39
Training manuals or other clinical/programmatic guidance materials	37.80% 31
I have never looked for this information	1.22% 1
Other (please specify)	7.32% 6

BASIC STATISTICS				
Minimum	Maximum	Median	Mean	Standard Deviation
1.00	11.00	5.00	5.69	2.78

#	OTHER (PLEASE SPECIFY)	DATE
1	We have very poor internet, so information sheets for health professionals and for patients that we can download and print to share at hospital (maybe also for policy makers, but i don't know the context well enough yet. I think the stats on the value of FP would be useful)	8/20/2017 8:34 AM

## Q8 My friends and colleagues typically believe...

Answered: 82 Skipped: 11

	YES	NO	I DON'T KNOW	TOTAL RESPONDENTS
Contraceptives are generally safe to use.	86.59% 71	8.54% 7	6.10% 5	82
Contraceptives, when used correctly, are generally effective in preventing pregnancy.	93.90% 77	3.66% 3	2.44% 2	82
Most contraceptives also protect against sexually transmitted infections such as HIV.	28.05% 23	65.85% 54	6.10% 5	82
Contraceptives are dangerous to a woman's health.	14.63% 12	78.05% 64	9.76% 8	82
Contraceptives often cause long-term problems with fertility.	14.63% 12	73.17% 60	12.20% 10	82

## Q9 We appreciate your suggestions. Please add any further comments, questions, or ideas that might help us in developing a strong discussion forum or other activities on family planning and contraception.

Answered: 37 Skipped: 56

#	RESPONSES	DATE
1	Investment cases for FP	8/24/2017 11:05 AM
2	The importance of changing social norms to increase use of modern FP -- including by youth who are often excluded from information until they are pregnant	8/23/2017 6:09 PM
3	Gender SRH integration	8/23/2017 5:37 PM
4	None.	8/23/2017 4:31 PM
5	Thé countries policies, beliefs and religion are very important. Most of contraceptive methods are for women not for men. Thèse factors effect negatively in my opinion.	8/23/2017 12:59 PM
6	in rural area, it is good to train CHW who can easily communicate in local langage. therefore there is a need for developping tools in local languages	8/23/2017 12:09 PM
7	1. Which contraceptives are available in your country of residence or place of work This is an added survey from me	8/23/2017 8:01 AM
8	None for now	8/22/2017 2:51 PM
9	Political will and commitments necessary to control population boom. Community Health Workers need to be thoroughly trained to serve hard to reach areas which are normally under served but high fertility rates. Programmes should be demand driven with the supply chain in continuous flow. Integration with HIV and AIDS programmes since Family Planning issues are like stand alone programmes whose donor support is not at all convincing. Youth Friendly Health services need to integrate family planning issues and need to be strengthened	8/22/2017 4:27 AM
10	I believe that family planning is helpful , in case of need to satisfy the need and to prevent abortion or unwanted pregnancy	8/21/2017 11:09 PM
11	visual/pictorial information for women is needed. One picture tells a thousand words. Absolutely important to have it in the first language of the population providing contraception for.	8/21/2017 4:01 PM
12	THE ROLE OF FAITH BASE ORGANIZATIONS IN REACHING THEIR MEMBERS WITH ADEQUATE INFORMATIONS	8/21/2017 12:12 PM
13	I think that LARCs need to be more divulgate.	8/21/2017 7:52 AM
14	Need locally tailored information perhaps in local languages	8/21/2017 6:56 AM
15	development of the focus group with regular exchange of the information	8/21/2017 4:13 AM
16	thanks and look forward to hearing results	8/20/2017 8:38 AM
17	Lack of using contraceptives is generally due to wrong or limited information stakeholders and users have.We all should try to discriminate correct information to them.	8/18/2017 1:37 AM
18	Intersectoral cooperation of gynecologists, juvenile gynecologists, pediatricians, general practitioners and children and adolescent psychologists. Adolescent education for 10 years of life.	8/17/2017 9:14 PM
19	Adolescents need friendly and professional access to RH information and contraceptives but many cultures refuse to accept that teens are sexually vulnerable or that older men initiate sex and do not support the girls or their babies or illnesses. Therefore protection from unwanted pregnancies and STIs outside of marriage is even more critical for healthy youth than ever!	8/17/2017 3:03 PM
20	Do you work with UNFPA	8/17/2017 9:41 AM
21	Material and stories of impact written in simple language is most useful for my work in a Ugandan non medical setting.	8/17/2017 2:37 AM

## HIFA Family Planning Project Survey

22	The last question states "My friends and colleagues" but I have answered what I believe instead. I don't know what my friends etc think about FP/C, as it is not discussed.	8/16/2017 4:47 PM
23	User's point of view needs to be considered and understood.	8/16/2017 4:36 PM
24	Funding bodies ignor local ngos and continue to give money to the government, which makes it difficult to the poor to benefit	8/16/2017 3:17 PM
25	Everyone should be involved, both the young and the old	8/16/2017 12:56 PM
26	I personally think most people in my locality especially young girls are still very much ignorant about contraception and family planning. this is due to lack of information and firm health campaigns to make this information available to them. For example I run a young girl empowerment and development program in my community and can tell without any contradiction that they know nothing about any family planning/ contraception methods that are available for the use and this is due to lack of first-hand information coursed by beliefs and societal customs.I think this gap really has to be broken for young girls and the society at large to get to know and use family planning methods and contraceptives.	8/16/2017 11:38 AM
27	develop onsite community meetings, trainings and campaigns. most people do not have access to internet to take in online discussions	8/16/2017 10:59 AM
28	easy availability & access to masses	8/16/2017 10:46 AM
29	People mostly from rural communities feel ashamed to discuss family planning openly. They feel that family planning if for people that are wayward.	8/16/2017 10:37 AM
30	Have talks in schools. Especially rural areas like Nanga Eboko in Cameroon where I reside. Here, its difficult to find a girl at 15 who doesn't have a baby. Teenage pregnancy has become a normal issue this way. Thanks	8/16/2017 10:14 AM
31	Family Planning and Contraception itself and talking about is still a taboo in our setting. Also, in a male-dominated society, in most of the cases it is the man who decides if his partner should/could use any method. Also, men do not want to get exposed by publicly buying condoms from a pharmacist, they would rather prefer pills to be taken by their partner/wife at their (men's) will.	8/16/2017 9:35 AM
32	Have FP discussion on social media for youth	8/16/2017 4:14 AM
33	separate and strong website to share the updates on contraceptives and other RH programs short and medium term online certificate courses	8/16/2017 1:45 AM
34	This s a reminder that UK family planning services are evidence based and led by the Faculty for Reproductive Health. Academic training and continuing education is readily available. Access to NHS emergency contraception remains patchy.	8/16/2017 12:08 AM
35	I am working in a non governmental organisation as a head and promoting family planning and contraception usage in poor families is one of our main activities	8/15/2017 9:16 PM
36	Unfortunately, the current USA administration is very ignorant about these issues and makes policy based on belief and prejudice rather than evidence	8/15/2017 6:53 PM
37	Focus on youth and family planning Integration of family planning with other maternal/neonatal services	8/15/2017 9:31 AM
